

Letter of Recommendation

Once in a while you come across an individual that grabs your attention from the first second. Mr. Jagger, Company Leader of 2creatEffects, is one of those rare individuals and he leads and educate with presence, integrity and passion. He approaches all issues with the deepest of sincerity and devotion. He brings that focus into all of his commitments, be it issues of national security or everyday human aspects.

I hired Mr. Jagger as the lead development manager to the concept of Cyberhygiene™. The concept consisted of different aspects of education about how to act safe and secure in cyberspace. It is a matter of e-learning combined with classroom education and traditional management consulting in order to gain information concerning the ROE for the specific customer. I personally consider him a one of my most trusted colleagues and I will highly recommend him to every position involving education or project management.
